

EIGHT MILE CREEK FARM

40 Johnny Cake Hill Road Westerlo, New York 12193
(518) 649-0950

Thank you for considering **Eight Mile Creek Farm's CSA** for the **2015** season! We want to thank our returning customers. Your support of our farm is what enables us to continue producing healthy food for the local community as well as to improve the environment through organic, sustainable farming methods. We would like to tell our new customers a little about our farm.

We are a **diversified, certified organic family farm** located on 223 acres in Albany County. We lease over one hundred acres of additional land for our hay, helping to keep farming viable in the Capital District! We have been certified organic since 2005, upholding the strict regulations set forth by the USDA and Northeast Organic Farming Association of New York. We believe it is important to be certified because it helps to insure that all of the small, family organic farms have a strong voice when it comes to making sure that the integrity of organics is upheld.

Eight Mile Creek Farm is a labor of love. We love our farm, our animals, and we consider our customers our **farm family**. We feel that our animals will keep us farming as long as we keep them happy. Therefore, their health and quality of life is priority. All of our animals receive the most vigilant care, the purist of water, and the healthiest feed. Our animals are never confined and graze our lush pastures from May until the snow falls. In the winter, our cows enjoy the highest quality organic hay. Our calves are born right here on our farm and nurse from their mothers for seven months. All of our animals are managed organically, without the use of medicated feeds, antibiotics or hormones. From our day-old chicks to our old mama cows, we believe that each of their lives plays a significant part in making our farm a healthy place. Thus, we respect and value their lives. Well managed and cared for, rotationally grazed through our fields, our soils are healthier, our pastures are thicker and greener, and our produce is more nutrient dense. By cultivating our farm, along with our animals' help, Eight Mile Creek Farm creates **healthy, nutritious food** for our community.

We believe that soil is the foundation of the farm. So, we strive to continue to improve the organic matter of the soils through the use of cover cropping, composting, crop and livestock rotations. As Sir Albert Howard, an English agronomist wrote in 1940: "Mother Earth never attempts to farm without livestock; she always raises mixed crops; great pains are taken to preserve the soil..." In fact, in the years since Howard wrote *An Agricultural Testament*, researchers have shown:

- *Plants grown in organically managed soils are more **nutrient dense** than those grown with synthetic fertilizers and are less susceptible to disease and pests.

- *Polycultures are more productive and stronger than monocultures.

- *The health of the soil, plant, animal, human and environments are connected.

We are committed to **sustainability**. We model our farm on nature, using no synthetic chemicals and use instead **well managed diversification** to return as much to the soil as we remove.

Our focus is on producing high **quality, 100% organic** products produced in a sustainable manner for the local community. To meet the demands of our larger families, we have a larger share option

to choose from, as well as our standard size share. We are excited about bringing you a nutritious and varied selection of produce this season!

Over 100 varieties of vegetables and herbs will be grown this year, including: **salad greens, carrots, string beans, beets, broccoli, corn, chard, arugula, braising greens, garlic, broccoli raab, brussel sprouts, bok choy, cabbage, mustard greens, onions, kale, collards, kohlrabi, basil, cilantro, dill, parsley, leeks, potatoes, peppers, tomatillos, radishes, rutabaga, turnips, spinach, dry beans, zucchini, summer and winter squashes, eggplant, lettuce, and tomatoes.**

We grow several varieties of these vegetables, giving you a wide array of colors, tastes and nutrients.

Membership Information

Pick-ups will be from mid-June through October. The total number of weeks for the regular season CSA will be 19 weeks. We offer a season extension in the fall. Information for the extension, pricing and vegetable list will be made available by the end of September. In addition, we offer monthly boxes throughout the winter months. Weekly newsletters will be delivered to you via email. These newsletters will contain news from the farm, nutritional info, cooking directions and recipes for the vegetables you are receiving.

Options we offer:

Any combination of the following options can be added to your weekly produce pick up.

CUT FLOWERS: A weekly bouquet of fresh cut, colorful, fragrant flowers that change with the season. Varieties include: sunflowers, cosmos, bachelor's button, daisy, lupine, gladiolas and more!

EGGS: Certified organic fresh eggs from our pastured hens. Our hens are a variety of heritage breeds, thriving on pasture, producing eggs rich in omega-3's, with beautiful orange yolks and multicolor shells!

BEEF: Our own grass-fed certified organic beef. Our animals are pasture raised. They graze from spring until the snow falls and eat our harvested organic hay during the winter. They are never given any antibiotics, growth hormones or by-products. This creates beef which is extremely nutritious, safe, tender, and flavorful.

CHICKEN: Our own certified organic chicken. Our broilers are raised with the strictest organic standards, for a nutritious, wholesome product. We raise happy chickens in a healthy environment. Choose from whole or half chickens.

PORK: Our own certified organic pork. Our pigs are fed only pure mixed whole organic grains and minerals along with lots of our own organic vegetables. They also get to be pigs- rooting and lounging around outside. We had rave reviews about our fresh pork, sausage, chops and bacon last year, so we have expanded our pork production.

Please Read and Sign

I, _____, commit to membership in Eight Mile Creek Farm's CSA for the 2015 harvest season. My membership will include weekly shares of freshly picked certified organic produce from Eight Mile Creek Farm from June through October, or 19 weeks. Since growing conditions can vary from season to season, I understand that the weekly harvest will also be variable, with size and weight of the shares being dependent upon the time of the season. My produce will be picked up by me each week or by someone I designate to pick up for me at the location noted on this contract. If one of the above share options has been added to my membership, it will be picked up with my produce. It is my responsibility to notify the farm at least 2 days in advance if I am unable to pick up my share. Alternate arrangements may be possible. An extraordinary amount of effort and planning goes into providing the CSA shares. Therefore, once the season begins, changing pick up sites cannot be granted. If pick up is missed, the food will be donated to a needy family. Eight Mile Creek Farm's CSA has been operating successfully now for over nine years. We operate in good faith, making every effort to provide our customers with the highest quality organic produce. Although our experience helps make up for many factors which can affect yields, we cannot control all situations, especially those related to weather extremes. Eight Mile Creek Farm will notify our customers 2 weeks prior to the first pick up. The goal for the first CSA pick up is mid- June.
